Rollover Report – January 2025

Thursday, January 30, 2025

Nifty Fut: 23,418.30 Bank Nifty Fut: 49,686.50

Market Overview:

Nifty extended its losing streak to four consecutive months, marking its worst run in 23 years, as weak earnings, foreign outflows, and economic uncertainty dampened market sentiment. The last time this phenomenon occurred was in 2001 when Nifty posted negative returns for four consecutive months. However, if we look at the month of January specifically, Nifty has delivered negative returns in 16 out of the last 26 years.

Nifty spot has fallen by 13.02% from the all-time high of 26,277 to yesterday closing of 23,249 levels. The decline began in October as 60% of Nifty 50 Company's Q2FY25 results fell short of market expectations. This led to leading broking houses slashing Nifty's EPS growth rate for FY25. This sentiment can continue after Q3FY25 results trigged further selling.

Over the past four months, from October 2024 to January 2025, foreign portfolio investors (FPIs) have withdrawn approximately Rs. 2,36,000 crore (secondary market) from Indian equities as of January 30. A stronger dollar, rising U.S. yields, tariff concerns, sluggish domestic economic growth, and high stock valuations kept the FPIs sentiments discourage.

Nifty & Bank Nifty Rollover:

In January, the Nifty index experienced a rollover of 80.77%, which stands higher the 3 & 6 months average of 79.26% & 77.82% respectively. The rollover cost for Nifty was 0.79%, slightly lower than the 3-month average of 0.80% but higher than the 6-month average of 0.64%.

On the other hand, Bank Nifty saw a rollover of 79.13%, which is higher compared to the 3-month of 74.59% and the 6-month averages of 71.29%. The rollover cost for Bank Nifty was 0.81%, higher the 3 & 6 month averages of 0.79% & 0.71% respectively.

Sector wise Rollover:

During the rollover activity for the month, sectors such Telecom, Power, Fertilisers, Infrastructure and Banking demonstrated robust participation. As market expecting major announcement for those sectors in the Budget. In contrast, sectors like Media, Cement, Technology and others saw weak rollover.

In February 2025, the market will closely track Q3FY25 earnings and the Fiscal Budget 2025, as policy announcements may influence market dynamics.

For Nifty Spot, strong support is seen at 22,800, followed by 22,600, potentially driving a rally. On the upside, resistance levels are anticipated at 23,300, with further hurdles at 23,500 and 23,800
