The risks described below are not the only ones that we currently face or are relevant to us or our Equity Shares and the industry in which we currently operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may also impair our businesses, results of operations, financial condition, cash flows or prospects. If any of the following risks, or other risks that are not currently known or are currently deemed immaterial, actually occur, any of our businesses, results of operations, financial condition, cash flows or prospects could be adversely affected, the trading price of our Equity Shares could decline and you may lose all or part of your investment. To obtain a complete understanding of our Company, prospective investors should read this section in conjunction with “**Our Business**”, “**Industry Overview**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on pages 99, 75 and 184 respectively, as well as the financial, statistical and other information contained in this Draft Prospectus.*

To the extent the COVID-19 pandemic negatively affects our business and results of operations, it may also have the effect of heightening many of the other risks described in this section. In making an investment decision, you must rely on your own examination of us and the terms of the Issue, including the merits and risks involved. You should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

*Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment, which may differ in certain respects from that of other countries. This Draft Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. For further details and risks in relation to commissioned reports, see “**Internal Risk Factors - We have referred to the data derived from the industry report prepared by Dun & Bradstreet Information Services Private Limited which has been commissioned and paid for by us for the purposes of confirming our understanding of the industry in connection with the Issue.**” on page 24.*

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section.

INTERNAL RISK FACTORS

1. The Coronavirus disease (COVID-19) pandemic has substantially affected and may continue to affect our business, results of operations, financial condition and cash flows in the future.

The outbreak of the COVID-19 pandemic, as well as the measures taken by the Government of India to reduce the spread of COVID-19, have had a substantial impact on our operations since the last week of March 2020 and further from April 2021. Further, the duration of the COVID-19 pandemic continues to remain uncertain, particularly since various mutations of the virus have emerged in several countries. In some cases, some of these mutations are reported to be more virulent.

Our sales have since started to recover post the pandemic period, although not exactly similar to the levels prior to outbreak of COVID-19. During the subsistence of the COVID-19 pandemic, there was a significant decline in demand of cashew and dry fruit related products division due the imposition of lockdown and strict containment measures, resulting into substantial fall in the consumption of cashews. Additionally, the Company’s office also experienced closures and employees have been restricted from commuting to their places of work. Consequently, the financial impact of COVID-19 has had, and is expected to continue to have, an adverse effect on the Company’s business and financial condition and result of operations.

While we have assessed the impact of the COVID-19 pandemic on our business, given the uncertainties

associated, we will continuously monitor and consider necessary the impact the COVID-19 pandemic has on our financial conditions, results of operation and cash flows.

For further details of our business and financial statement, please see section titled “***Our Business***” beginning on page 99 of this Draft Prospectus.

2. *If we are unable to foresee or respond effectively to significant competition, our business, results of operations and financial condition could be adversely affected.*

Our Company faces competition in the dry-fruit industry in general and the cashews segment in particular, from both organized and unorganized, and potential new entrants to the segment, who may have more flexibility in responding to changing business and economic conditions. Some of our competitors may have greater financial resources or a more experienced management team than us. They may also benefit from greater economies of scale and operating efficiencies. Competitors may, whether through consolidation or growth, present more credible integrated or lower cost solutions than we do, which may have a negative effect on our sales. Further, our competitors may offer their products at more aggressive prices which also could adversely affect our sales.

We may also face competition from existing, experienced competitors willing to accept low margins on investment in order to enter new markets as well as from business conglomerates willing to cross subsidize a new business in order to enter new markets. We cannot assure you that we will be able to continue to compete effectively with our competitors.

Our failure to compete effectively, including any delay in responding to changes in the industry and market conditions, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability. A significant increase in competition could exert downward pressure on prices, lower demand for our products, an inability to take advantage of new business opportunities and a loss of market share, all of which would adversely affect our business, financial condition, results of operations and prospects.

For further details of our business, please see section titled “***Our Business***” beginning on page 99 of this Draft Prospectus.

3. *We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.*

We are governed by various applicable laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits for carrying out our processing and packaging activities. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Our Company has applied for consent to operate under Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act, 1981 for its Unit-1/Processing Unit situated at Gat No.12, Village Halkarni, Taluka Chandgad, district Kolhapur and the same is pending for approval before the applicable regulatory authorities. Further our Company has obtained the consent to operate under Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act, 1981 for Unit -2/Packaging Unit situated at Gat.no.89/B, Village Shinoli, Taluka Chandgad which has been inadvertently misplaced and not available for presentation.

Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at State Government levels. If we fail to comply, or a regulator claims that we have not complied, with these conditions, we may not be able to commence or continue with work or operate these projects. Our Company has applied for certain licenses, approvals and consents to applicable statutory authorities for its processing and packaging units which are currently pending. For further information on various approvals or licenses required in connection with our operations, please see the section titled “***Government and other Statutory Approvals***” on page 210 of this Draft Prospectus.

4. *Our marketing and advertising campaigns may not be successful in increasing the popularity of our products. If our marketing initiatives are not effective, this may affect the popularity of our products which could have collateral negative effect on sales.*

Our Company undertakes certain marketing and advertising initiatives with the purpose of increasing the visibility of our brand which include television commercials, print publication, radio, digital media, public relations, consumer offers, roadshows and advertisements on regional channels in the states in which our Company has presence

Further, our revenues are influenced by marketing and advertising of our products through various means. We rely to a large extent on our senior management's experience in defining our marketing and advertising programmes. If our senior management leads us to adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers. If our marketing and advertising programmes are unsuccessful, our results of operations could be materially adversely affected.

In addition, increased spending by our competitors on advertising and promotion could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business.

5. *There is one outstanding legal proceeding involving our Company. Any adverse decision in such proceeding may have a material adverse effect on our business, results of operations and financial condition.*

Our Company is involved in a legal proceeding which is pending with regulatory authorities. A summary of the pending proceeding involving the Company is provided below:

Cases against our Company

(₹ in Lakhs)		
Nature of cases	No. of outstanding cases	Amount involved
Criminal Complaints	Nil	Nil
Statutory/Regulatory Authorities	Nil	Nil
Other Litigation – Taxation	1.00	25.75
Other Litigation	Nil	Nil

For further details of legal proceedings involving the Company, please see section titled “***Outstanding Litigations and Material Developments***” beginning on page 205 of this Draft Prospectus.

6. *Our Company is exposed to to risk of doing business in foreign countries due to the constantly changing economic, regulatory, social and political conditions in the jurisdictions in which we operate and seek to operate, which could adversely affect our business, financial conditions including margins and results of operations.*

Our Company procures majority of the raw materials by way of import from certain countries namely Benin, Indonesia, Guinea-Bissau and also in new jurisdictions in which we seek to operate. In Fiscal 2021, we procured around 71% of our raw materials from Benin.

Operating in the international markets exposes us to a number of risks, including, but not limited to, compliance with local laws and regulations, which can be onerous and costly as the magnitude and complexity of, and continual amendments to those laws and regulations are difficult to keep abreast with and the liabilities, penalties, costs, obligations and requirements associated with these laws and regulations can be substantial. Our failure to comply with and adapt to changing international regulations and/or trends may result in us failing to maintain and/or expand our international sales operations, which could adversely affect our business, financial condition and results of operations. In case of any contingencies in the future, due to which we are unable to operate effectively in these markets, our results of operations, revenues and profitability may be adversely affected.

7. *Our Company requires significant amount of working capital for a continuing growth. Increase in business activities may be reflected by an absolute increase in the gap between our trade receivables and trade payables, requiring us to arrange for increased working capital limits. Our inability to meet our working capital requirements may adversely affect our results of operations*

Our business requires a significant amount of working capital. In our business, working capital is often required to finance the purchase of raw material and for processing activities. In the event, we are unable to source the required amount of working capital, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

All of these factors, including increase in business activities, may widen the absolute gap between trade receivables and trade payables putting strain on our Company's financial resources and may result in increase in the amount of short-term borrowings/ working capital loans. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

8. *If we are unable to maintain our product quality standards it may lead to negative publicity which may adversely affect our reputation, business and results of operations.*

Any adverse claims, media speculation and other public statements relating to our product quality would materially and adversely affect our reputation and our corporate image, or otherwise affect our ability to conduct our business in the ordinary course, including, without limitation, obtaining and renewing operational licenses and regulatory approvals and establishing and maintaining our relationships with distributors, and to expand our business, including, without limitation, obtaining the necessary financing for such expansion. Further, concerns regarding the safety of products or the safety and quality of our supply chain could cause customers to avoid buying our products, or to seek alternative sources, even if the basis for the concern is outside of our control. Adverse publicity about these concerns, whether or not ultimately based on fact, and whether or not involving our products, could discourage have a material and adverse effect on our turnover and results of operations. In addition, we cannot guarantee that our operational controls and employee training will be effective in preventing food-borne illnesses, food tampering and other food safety issues that may affect our operations.

We cannot assure you that there will not be incidents of contaminated products or ingredients in the future which may result in product liability claims, product recall and negative publicity. Any such claims and allegations would also distract our management from their day to day management responsibilities and may therefore have a material adverse effect on our business, financial condition and results of operations.

Any publicity relating to health concerns or the perceived or specific outbreaks of food-borne illnesses, food tampering or other food safety issues attributed to our products could result in a significant decrease in sales in all could have a material adverse effect on our results of operations. In addition, similar publicity or occurrences with respect to other similar products belonging to other companies could also decrease our sales and have a similar material adverse effect on us.

9. *If we are unable to acquire quality raw materials or other necessary supplies and services in a timely manner, our business, results of operations and financial condition may be adversely affected.*

The key raw material required by our Company is raw cashew nuts which is procured by our Company from domestic and international markets. In FY 2021, we procured 71% of our raw material from Benin, Indonesia and Guinea-Bissau and the balance was procured from the domestic market especially from the Konkan region. Import from Benin accounted for 70% of our total imports. Our profitability depends in part of our ability to anticipate and react to changes in the cost of our suppliers and to procure the raw material in a timely manner. Increase in cost of raw materials imported could significantly increase our expenses.

Even though, till date our Company has not experienced any instances of delay in procurement and shipment/delivery of raw materials from international markets, we cannot assure you that there won't be any instances of delay in the future. Such delay in delivery of raw material by our international suppliers would adversely affect our business operations.

10. *Our financing arrangements contain restrictive covenants whereby we are required to obtain prior consent from our lenders regarding aspects such as major changes in share capital, management etc.*

Our financing arrangements contain restrictive covenants whereby we are required to obtain prior consent from our lenders regarding aspects such as major changes in share capital, management. Although we have sought the requisite consents from our lenders, due to ongoing restrictions and work from home situations we are yet to receive consents from some of our lenders with whom we have entered into financial arrangements. There can be no assurance that such consents will be received by us before the filing of this Draft Prospectus or at all. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs.

This may result in breach of certain covenants contained in the agreements entered into with our lenders. For further details on the covenants with respect to financial arrangements and other banking facilities, please see “**Financial Indebtedness**” on page 175 of the Draft Prospectus.

11. *We may be unable to attract and retain sufficient qualified and trained personnel at our processing and packaging units which may adversely affect our business.*

Our Company has skilled, semi-skilled and unskilled personnel engaged at our processing and packaging units. One of their responsibilities is to maintain specific standard, quality and safety of our products. There can be no assurance that attrition rates for our personnel will not increase. A significant increase in our personnel attrition rate could also result in decreased operational efficiencies and productivity, loss of market knowledge and an increase in recruitment and training costs, thereby materially and adversely affecting our business, results of operations and financial condition.

We cannot assure you that we will be able to find or hire personnel with the necessary experience or expertise. In the event that we are unable to hire people with the necessary knowledge or the necessary expertise, our business may be severely disrupted, financial condition and results of operations may be adversely affected. Our success depends on our ability to attract, hire, train and retain skilled service personnel. An inability to recruit and retain suitably qualified and skilled personnel could adversely impact our reputation, business prospects and results of operations.

12. *If we are unable to accurately estimate the demand for our products, our business, financial condition and results of operation may be adversely affected.*

The supply of raw materials for our products is based primarily on forecasts, projections and requirements prepared by our senior management personnel. These forecasts are based on past sales as well as anticipated demand, which is based to a certain extent on the subjective assessment by our senior management personnel.

If we are unable to accurately forecast demand for our products it would lead to excess supply or a shortage in supply of raw materials from our suppliers, which would have a material adverse impact on our business, financial condition and results of operations.

13. *We have an outstanding indebtedness which includes secured and unsecured loan, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.*

As of October 31, 2021, our secured and unsecured borrowing were ₹1,152.43 Lakhs and we will continue to incur additional indebtedness in the future as deemed appropriate by our Board of directors from time to time. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements;
- increasing our finance costs.

In the event we breach any financial or other restrictive covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due.

14. *We have significant power requirements for continuous functioning of our processing and packaging units. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an adverse effect on our business, results of operations and financial condition.*

The machinery and equipment installed at our processing unit, packaging unit and warehouse consume power and the same is sourced by our Company from MSEB. Our Company has a total sanctioned load of 223 kilo watts and we also have one (1) generator at our Processing Unit to have a continuous power supply. However we do not have any power back up sources at our Packaging Unit. As the processing and packaging activities are significantly dependent on power supply, any interruptions in power supply may disrupt our operations resulting

into business and financial results.

Further, we have limited options in relation to maintenance of power back-ups such as diesel generator sets and any increase in diesel prices will increase our operating expenses which may adversely impact our business margins. Since we have significant power consumption, any unexpected or significant increase in its tariff can increase the operating cost which may negatively affect our business, financial condition and results of operations

15. We have referred to the data derived from the industry report prepared by Dun & Bradstreet Information Services India Private Limited which has been commissioned and paid for by us for the purposes of confirming our understanding of the industry in connection with the Issue.

We have availed the services of an independent research agency, Dun & Bradstreet Information India Private Limited which is not related in any manner to us, our Promoters or Directors, to prepare an industry report title 'Industry Report on Indian Cashew Market' for the purpose of inclusion the Draft Prospectus. This report is subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified the data from the industry report. Although we believe that the data may be considered to be reliable, the accuracy, completeness and underlying assumptions are not guaranteed and dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or the Lead Manager or any of our or its respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere, Statements from third parties that involves estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

16. We are dependent on third party transportation service providers for delivery of raw material to us from our suppliers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.

We are significantly dependent on third party transportation providers for the delivery of raw material to us from our international suppliers. Uncertainties and risks such as transportation strikes, failure to book vessels or delay in supply of raw materials due to port congestions, vessel/vehicle breakdown could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw material may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to procure or transport the raw material or to deliver the same to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any agreements or contracts with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transporters would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the raw material suffers damage or is lost during transit, we may not able to prosecute the transporters due to lack of formal agreements. Further, the transporters are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

17. If we are unable to regularly offer new products or if we fail to timely respond to changes in consumer tastes and preferences our business and results of operations would be adversely affected.

We offer a wide variety of cashew products including different grades and packaging formats. The markets in which we operate may demand frequent change in the future including new variant introductions. We plan our products based on consumption patterns as well as on anticipated trends and preferences in the forthcoming seasons. Any mismatch between our forecasts, our planning, introduction of new products and the actual demand could impact us adversely, leading to loss of existing customers.

Before we can introduce new products, we must successfully execute a number of steps, including market research and customer feedback. However, there can be no assurance that such efforts will always result in identifying

successful new products and avoiding unsuccessful introductions. Although we rarely substantially modify our product portfolio, an inability to successfully introduce new products could adversely affect our business, financial condition, results of operations and prospects.

Consumer preferences in the markets we operate in are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage. Our business is particularly sensitive to changing consumer preferences, including changes in consumer tastes and dining habits. Health, dietary and other considerations may also result in changes to consumer preferences, which may in turn result in reduced demand for our products. The demand for our offering or our costs of doing business may also be adversely affected by public concern about nutrition, food safety and other factors. Our continued success depends on our ability to anticipate, gauge and react in a timely and cost-effective manner to changes in consumer tastes. Any changes in consumer preferences that decrease demand for our offering our business, financial condition, results of operations and prospects would be adversely affected.

18. Our Company does not have any firm arrangements and has not entered into any written agreements or contracts with the distribution partners who are responsible for carrying out the distribution and sale of our products.

Our Company procures orders through our customers based on past sales from various distributors. We primarily caters to the domestic market with a presence of more than thirty (30) distributors spread across India. Our Company has not entered into any written contracts or agreements with the distributors and business with them is carried out by our Company on an invoice basis. In the event of a dispute between our Company and the distributors, there are no formal terms, conditions or covenants which govern the arrangement that our Company has with the distributors. We cannot assure you that we will be successful in continuing to receive uninterrupted and quality services from the distributors.

Any disruption or inefficiency in the services provided by the distributors, could interrupt the distribution and sale of our products, our business operations and also could potentially damage our reputation

19. We have had certain inaccuracy in relation to statutory compliances. We cannot assure you that our Company will not be subjected to any liability on account of such non-compliance and discrepancies.

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all applicable statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. For instance, our Company has not complied with some of the applicable provisions of Maharashtra Factories Act, 1948, Maharashtra Factories Rules, 1963, Water (Prevention and Control of Pollution) Act, 1974 and Air (Prevention and Control of Pollution) Act, 1981. Upon the non-compliances coming to our knowledge, we have instantly applied for the applicable licenses, consents and approvals required by our Company.

Although no show cause notice has been issued against the Company till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, penal actions may be taken against the Company and its directors, in which event the financials of the Company and its directors may be affected.

20. Our Company has a limited number of customers generating significant portion of revenue from sales. The loss of a key customer in a financial period could significantly reduce our revenue and could have a material adverse effect on our business, future prospects, results of operations and financial condition.

The contribution of top ten (10) customers of our Company towards the total revenue for seven months period ended October 31, 2021 and Fiscal years 2021, 2020 and 2019 is 37.16%, 36.06% , 17.83% and 19.00% respectively. We neither assure you that we will be able to maintain the historic levels of business from our top ten (10) customers or that we will be able to replace these key customers should we lose any or all of them. Since we are dependent on our key customers for a significant portion of our operations, the loss of any one of our key customers or a significant reduction in demand from such key customers could have a material adverse effect on our business, future prospects, results of operations and financial condition.

21. We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.

As of October 31, 2021, our contingent liabilities and commitments (to the extent not provided for) as disclosed in the notes to our Audited Restated Financial Information aggregated to ₹ 25.75 Lakhs. There has been a delay in obtaining the registration under Employees' State Insurance Act, 1948 since the time it was applicable, there may be additional liability which will arise on the basis of the assessment, for the employer contribution to be made under the said Act.

For further details of contingent liability, please see the section titled - "**Financial Information**" on page 144 of this Draft Prospectus. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

22. *We are dependent on a number of our key managerial personnel and other senior management, and the loss of or our inability to retain such persons could adversely affect our cash flows, business, results of operations and financial condition.*

Our performance depends largely on the efforts and abilities of our key managerial personnel and other senior management, including our present directors and officers. Their input and experience are invaluable for the development of our business and the operations and the strategic directions taken by us. We cannot assure you that we will be able to retain these key managerial personnel and other senior management or find adequate replacements in timely manner, or at all, should they choose to discontinue their association with us. We believe that competition for qualified managerial personnel with relevant expertise in India is intense due to scarcity of qualified and experienced individuals in the industry in which we operate. The retirement or resignation of any of our key managerial personnel may materially and adversely impact our business, results of operations and financial condition.

In addition, we cannot assure you that our relations with our employees shall remain cordial at all times and that employees will not undertake or participate in strikes, work stoppages or industrial actions which won't be particularly in the best interest of the our Company. Any disruptions may affect our operations, thereby adversely affecting our business, financial condition and results of operations.

23. *Our limited knowledge with respect to new geographies in the international and domestic markets where we propose to enter may limit our expansion strategy and cause our business and growth to suffer.*

We may face risks in expanding our operations in new geographical areas in international and domestic markets in which we do not possess the same level of familiarity with the economy, consumer preference, commercial operations and distribution network and with product offerings that we have limited operating experience of. In addition, our competitors in such geographical areas may already have established operations in such areas and particularly in this industry, and we may find it difficult to attract customers in such areas.

Our expansion plans could be delayed or abandoned, could cost more than anticipated and could divert resources from other areas of our business or divert management's attention from other aspects of our business and place a strain on our management, operational and financial resources, as well as our information systems, any of which could impact our competitive position and reduce our revenue and profitability. For further details of our business, please see to the section titled "**Our Business**" beginning on page 99 of this Draft Prospectus.

24. *We do not own some of the crucial properties which are currently used by us .*

Our Processing unit situated at Gat.no.12, Village Halkarni, Taluka Chandgad, District Kolhapur, Maharashtra, our Packaging unit situated at Gat.no.89/B, Village Shinoli, Taluka Chandgad, District Kolhapur and our warehouse situated at Village Kudremani, District Belgavi, Karnataka are not owned by us. We are occupying the premises on basis of Leave and License agreement signed by our Company. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable/favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new premises and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

For details regarding such leasehold properties, please see section titled "**Our Business**" on page no. 99 of this Draft Prospectus.

- 25. Any failure in our quality control and procurement process may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.**

Our Company has quality control checks before accepting or booking any consignment of raw material since it has a direct impact on the quality of finished products. Further the raw material may also deteriorate in quality, decay or get damaged during transit. We have implemented quality control processes for raw material that we procure, on the basis of internal and international quality standards. It is imperative for us to meet the quality standards set by our customers and deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for low quality products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

- 26. We have been recently converted into public limited company and any non-compliance with the provisions of Companies Act, 2013 may attract penalties against our Company which could impact our financial and operational performance and reputation.**

Our Company was been incorporated as a private limited company pursuant to the provisions of Companies Act, 1956 and converted into a public limited company pursuant to special resolution passed at the Extra Ordinary General Meeting dated November 08, 2021. Prior to conversion, the provisions pertaining to public limited companies of the Companies Act were not applicable to us. However, consequent to the aforesaid conversion, our Company is required to observe compliance with various provisions pertaining to public limited companies of the Companies Act. Further, our Company needs to additionally comply with provisions of SEBI ICDR Regulations and SEBI (LODR) Regulations.

Though our Company will endeavour to take all possible steps to comply with the provisions of the Companies Act and other applicable laws and regulations, in case of our inability to do so or in case of any delay, we may be subject to penal action from the appropriate authorities which may have an adverse effect on our financial and operational performance and reputation.

- 27. Our Company is subject to the risk of currency fluctuations and floating exchange rates.**

Our Company is involved in various import operations with international suppliers and has to make payments to its international suppliers in U.S. Dollars as per the terms and conditions of the contract. Our import operations make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it could adversely affect our business, results of operations, financial conditions and cash flows.

- 28. The procurement of raw material is subject to seasonal factors. Consequently, our inability to accurately forecast demand for our products, may have an adverse effect on our business, results of operations, cash flows and financial condition.**

Cashew being a water intensive crop, majority of the farmers depend on rain for cultivation. Generally, rainfall occurs during *Kharif* season and hence, the timing and seasonality of rainfall impacts the import and procurement of raw material operations of our Company. We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary.

Further, while we forecast the demand for our products and accordingly plan our procurement volumes for import operations, any error in our forecast could result in surplus stock, which may not be sold in a timely manner. The raw material procured has a specific shelf life and if not sold prior to expiry, may lead to losses or if consumed after expiry, may lead to health hazards.

We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations, future cash flows and financial condition.

29. *If we are not successful in managing our growth, our profitability may decrease and result in adverse impact on our business, results of operations and financial condition.*

A principal component of our strategy is to grow by expanding and enhancing our customer base and the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

30. *If we suffer a large uninsured loss or if we suffer an insured loss that significantly exceeds our insurance coverage, our financial condition and results of operations may be adversely affected.*

Our business, assets and furniture, fixtures could suffer damage from fire, natural calamities, misappropriation/ burglary or other causes, resulting in losses, which may not be fully compensated by insurance. As on date of the Draft Prospectus we have a total insurance coverage of ₹2,329.38 Lakhs. There can be no assurance that the terms of our insurance policies which we will take in future will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, we are required to renew the insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, we may face significant uninsured losses. If we suffer a large uninsured loss or if any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

31. *Our operations can be adversely affected in case of industrial accidents at our processing and packaging units. Further, any fire or mishap or accidents of such nature at the Company's facilities could lead to accident claims and damage and loss of property, inventory, raw materials, etc.*

Our processing and packaging activities require the use of machines and power, which makes the labour employed at our units prone to accidents that occur during the course of our operations resulting in personal injuries causing permanent disability or even death. Though our Company has adopted adequate safety measures, we cannot assure you that, in the future no such cases will be instituted against our Company, alleging that we were negligent or we did not provide adequate supervision therefore, holding us liable for injuries that were suffered during the manufacturing of our products. In the event any such accidents take place in the manufacturing unit of our Company, we may get involved in litigation or other proceedings, or be held liable in any litigation or proceedings, incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations.

32. *We have in the past entered into related party transactions and may continue to do so in future.*

We have entered into certain transactions with related parties, including our Promoters and Group Companies and may continue to do so in future. These transactions entered into with, amongst others, our Promoters and Group Companies typically relate to remuneration and payment of rent for use of property etc. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

There can be no assurance that we would not have achieved more favourable commercial terms with other parties. Furthermore, we may enter into related party transactions in the future, and such transactions may potentially involve conflicts of interest. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our results of operations and financial condition. For more information, please see section titled “*Annexure XXXI*” - *Restated Statement of Related Party Disclosures*” of “*Financial Information*” on page 144 of this Draft Prospectus.

33. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure

you that our Directors would always exercise their rights as shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may carry out or restrict actions in relation to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby affecting our business and results of operations and prospects.

34. *Any Penalty or demand raise by statutory authorities in future will affect our financial position of the Company.*

Our Company is mainly engaged in cashew and related products segment of dry-fruit products industry which attracts tax liability such as Goods and Service Tax, Income Tax and other applicable provision. Also, the provision under Food Safety and Standards Authority of India is also applicable to us. However, the Company has been complying the applicable regulations but any demand or penalty raised by the concerned authorities in future for any previous year and current year will affect the financial position of the Company. For detail, please see section titled “*Outstanding Litigations and Material Developments*” beginning on page 205 of this Draft Prospectus.

35. *If there is a change in policies related to tax, duties or other such levies applicable to us, it may affect our results of operations.*

We benefit from certain general tax regulations and incentives that accord favorable treatment to certain of our operations as well as for our activities. These tax benefits include income tax deductions and other taxes. For details regarding income tax deductions, please see section titled “*Statement of Possible Special Tax Benefits*” on page 69 of this Draft Prospectus.

New or revised accounting policies or policies related to tax, duties or other such levies promulgated from time to time by the relevant authorities may significantly affect our results of operations. We cannot assure you that we would continue to be eligible for such lower tax rates or any other benefits. The reduction or termination of our tax incentives, or non-compliance with the conditions under which such tax incentives are made available, will increase our tax liability and affect our business, prospects, results of operations and financial condition

36. *In the past, there have been instances of filing errors of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC.*

In the past, there have been certain instances errors in filing statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently refiled by payment of an additional fee as specified by RoC.

37. *Our Group Companies have incurred losses in the past and may incur losses in the future*

One of our Group Company, namely SSBA Innovations Private Limited is a fintech venture. There is a loss in the books of accounts for last three financial years. This venture has already raised seed funding of USD one million, has incurred loss in the past. Additionally Emphyrean Speciality Sugar and Biomass Limited also suffered a loss in two out of the last three financial years. There can be no assurance that our Group Companies will not incur losses in the future, which may have an adverse effect on our reputation and business.

38. *Our inability to manage inventory in an effective manner could affect our business.*

Our business model requires us to maintain a certain level of inventory of raw material, to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

39. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/or additional indebtedness.*

As on October 31, 2021 our Company's total secured and unsecured borrowings amount to ₹1,152.43 Lakhs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please see the chapter titled - "**Financial Indebtedness**" on page 175 of this Draft Prospectus.

40. *Our failure to adapt to technological developments or industry trends could affect the performance and features of our products, and reduce our attractiveness to our customers.*

As our operations grow in scope and size, whether through offering of new products or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced and varied products ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition. For further details regarding our business, please see section titled "**Our Business**" beginning on page 99 of this Draft Prospectus.

41. *Our funds requirements are based on internal management estimates and have not been appraised by any bank or financial institution. Any increase in the actual deployment of funds may cause an additional burden on our finance plans. We have not entered into definitive agreements to utilize our Issue proceeds.*

The fund requirement mentioned as a part of the Objects of the Issue is based on internal management estimates, wherever possible, and has not been appraised by any bank or financial institution or any external agency. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. With increase in costs, our actual deployment of funds may exceed our estimates and may cause us an additional burden on our finance plans. As on the date of the Draft Prospectus, we have not entered into any definitive agreements for implementing the Objects of the Issue.

42. *Our Company's management will have flexibility in utilizing the Net Proceeds from the Issue. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the Net Proceeds towards working capital requirement and for general corporate purposes as described in section titled "**Objects of the Issue**" on page 59 of this Draft Prospectus. In terms of Regulation 262 of the SEBI ICDR Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹10,000 Lakhs. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the

proceeds of the Issue, our business and financial results may suffer.

- 43. *We have not identified any alternate source of raising the funds mentioned as our “Objects of the Issue”. Any shortfall in raising/meeting the same could adversely affect our growth plans, operations and financial performance.***

Our Company has not identified any alternate source of funding for our working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the Company.

For further details of our Object, please see section titled “*Object for the Issue*” beginning on page 59 of this Draft Prospectus.

- 44. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

- 45. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business being working capital intensive, we may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. There can be no assurance that our Company will declare dividends in the future. For further details, please see section titled “*Dividend Policy*” on pages 143 of this Draft Prospectus.

- 46. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

- 47. *Any issuance or sale of the Equity Shares by any existing shareholder could significantly affect the trading price of the Equity Shares.***

Any future issuance of Equity Shares by us or the disposal of Equity Shares by any of the major shareholders or the perception that such issuance or sales may occur may significantly affect the trading price of the Equity Shares. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber their Equity Shares.

ISSUE SPECIFIC RIKS

- 48. *The Equity Shares issued pursuant to the Issue may not be listed on and NSE Emerge in a timely manner, or at all, and any trading closures at NSE Emerge may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there

could therefore be a failure or delay in listing the Equity Shares on NSE Emerge. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares. NSE Emerge has in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including our Equity Shares. A closure of, or trading stoppage on NSE Emerge could adversely affect the trading price of the Equity Shares.

49. *QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

50. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months may be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

51. *After the Issue, the price of our Equity Shares may be highly volatile, or an active trading market for our Equity Shares may not develop.*

The price of our Equity Shares on the Stock Exchange may fluctuate after the Issue as a result of several factors, including: volatility in the Indian and global securities market; our operations and performance; performance of our competitors; adverse media reports about; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal regulations. There has been no public market for our Equity Shares prior to the Issue and the price of the Equity Shares may fluctuate after the Issue. If the stock price of the Equity Shares fluctuates after the Issue, investors could lose a significant part of their investment. As of the date of this Draft Prospectus, there is no market for the Equity Shares.

EXTERNAL RISK FACTORS

52. *The occurrence of natural or man-made disasters may adversely affect our business, results of operations and financial condition.*

Given the nature of our operations, the occurrence of natural disasters, including hurricanes, floods, tsunamis, earthquakes, tornadoes, fires, explosions, pandemic disease and manmade disasters, including any military actions or political instability, may adversely affect our financial condition or results of operations. We are particularly susceptible to accidents, system failures, adverse geological, ecological or weather conditions, natural disasters, demographic and population changes and other unforeseen events and circumstances across India and countries

from where we import our raw materials from. While we are covered by our insurance policies for such contingencies, any disruptions, damage or destruction of our facilities may temporarily affect our ability to carry out our business and which may adversely affect our, results of operations and financial condition.

53. *Our continued operations are critical to our business and any shutdown of our processing and packaging units may adversely affect our business, results of operations and financial condition.*

Our processing and packaging units are located in Kolhapur, Maharashtra. Any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our processing and packaging units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our processing and packaging units for a prolonged period, it would adversely affect our earnings, our results of operations and financial condition as a whole. Spiraling cost of living around our units may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. For instance, due to the ongoing pandemic and the lockdown imposed by the Central Government and various state governments, we may be required to shut down all our manufacturing units

54. *Terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving may adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, and adversely affect our business. Such incidents may also create a greater perception that investment in Indian companies involves a higher degree of risk and may have an adverse impact on our business and the price of our Equity Shares. Further, we cannot predict the effects on our business of heightened security measures, threatened terrorist attacks, efforts to combat terrorism, military action against a foreign state or other similar events. It is possible that one or more of these events could be directed at Indian or foreign ports, borders, railroads or highways. Any of these events could also negatively affect the economy and consumer confidence, which could cause a downturn in the transportation industry. In addition, any deterioration in the relations between India and its neighbouring countries may result in investor concern about stability in the region, which may materially and adversely affect the price of our Equity Shares.

55. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies.

56. *The requirements of being a listed company may strain our resources and we may incur additional costs.*

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing compliances and reporting requirements to the Stock Exchanges, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial

condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

Further, as a listed company we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could affect our business, prospects, results of operations and financial condition and the price of our Equity Shares. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely manner.

57. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

58. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

59. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, are not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

60. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely

affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

India Macro-Economic Overview

Introduction

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10- 15 years, backed by its robust democracy and strong partnerships.

INDIAN ECONOMY AT LARGE

The Covid-19 pandemic which broke out in November 2019 and spread out to infect more than 190 countries across the globe by May 2020 - has forced economies (both, developed, as well as developing) to go into lockdown mode, to contain the spread of the disease. The COVID-19 induced lockdown and the necessary containment measures have led to a serious blow on economic activity globally including India in March 2020, the country was struck by the Covid-19 outbreak. Hit by the coronavirus pandemic and subsequent lockdown, India's annual GDP growth shrunk by 7.3% in FY 2021 as compared to 4% y-o-y growth in the previous year. On a quarterly basis, GDP growth has observed a steady reduction since Q1 FY 2019 though it remained in positive zone till Q4 FY 2020. Post March 2020, the Covid-19 pandemic ravaged the economy where India's GDP contracted by the steepest among G20 nations during the Q1 FY 2021. During the April – June 2020 period, India's GDP contracted by 23.9%. This was largely in line with expectation as the economy was under strict lockdown nearly two months of the first quarter. The lockdown was lifted partially in May end, and since then the economic is being opened in phases. Unlocking of the economy in phases, helped the economy to narrow down the losses but at broader level the overall GVA continued to decline on annual basis in FY 2021.

Pandemic induced depressed business sentiments and restriction pull down the overall GVA growth in FY 2021. According to the MOSPI data, annual GVA growth declined by 6.2% in FY 2021, as against 4.1% growth in FY 2020.

Annual Sectoral Performance

Pandemic induced lockdown and restriction pull down the overall GVA growth in FY 2021. According to the Provisional Estimates released by MoSPI, annual GVA growth declined by 6.2% in FY 2021, as against 4.1% in FY 2020.

Source: MoSPI. R.E.: Revised Estimate. P.E.: Provisional Estimate

On sectoral basis, only agriculture sector registered growth in FY 2021, although it moderate in comparison to last year, while annual growth in industrial and services sector contracted by 7% and 8.4% respectively. The positive change in agriculture output is attributed to normal monsoon along with yearlong water availability in reservoirs and slew of measures announced by the government to support agriculture and allied sector.

In the industrial sector, growth across major economic activity such as mining, manufacturing, construction sector slumped, and it registered a decline of 8.5%, 7.2% and 8.6% in FY 2021 against -2.5%, -2.4% and mild 1% change in FY 2020, respectively. Within industrial sector, only utilities sector observed growth of 1.9%, although it continued to slow in FY 2021 as compared to 2.1% y-o-y growth in FY 2020 and 8% in FY 2019.

Talking about the services sectors performance, the overall sector growth was worst hit largely due to sharp contraction (-18.2% y-o-y change in FY 2021) in the GVA generated by the trade, hotels, transport, communication, and services related to broadcasting hit segment. Particularly, services related to hospitality was the one of the first sector that got affected with Pandemic and is still dealing with ailing business scenario. Other segment too within broader services industry i.e., Financial, Real Estate & Professional Services and Public Administration, Defense, & Other Services are estimated to contract by 1.5% and 4.6% on y-o-y basis, respectively. The pandemic driven slowdown in manufacturing and service sector was a drag to the overall GVA in FY 2021.

India's Economic Outlook

The abatement of the 2nd wave and the strong push for vaccination has uplifted the business optimism and the growth prospects of the economy. With easing of containment measures, mobility is increasing, and several high frequency indicators also point to the pick-up in the economic activities. Dun & Bradstreet's latest analysis shows, optimism amongst businesses for Q3 2021 has revived from the dip witnessed in the previous quarter. Optimism levels improved as business activity picked up. The pickup in business activity is also indicated by our COVID-19 Commerce Disruption Tracker. Data shows around 23% of businesses in India remained disrupted by 2nd week of July 2021 from close to 50% of businesses from 3rd week of May 2021.

While the data for e-way bills also indicate the increase in business activity, the rise in two & three wheelers and tractor sales reflect the return of demand in the rural segment on better monsoon prospects. The hike in dearness allowance from 17% to 28% for the current and retired government employees should also support the revival in aggregate demand which is yet to gather a strong foothold.

The external demand has also been supporting the revival in growth. India posted robust growth in exports in tandem with the world merchandise trade. India's exports surpassed the USD 30Bn mark for the fourth month in a row in June 2021 while non-oil export growth has been growing positively for the 10th consecutive month. Foreign investors'

confidence on the economy augurs well for the growth prospects. India was the fifth largest recipient of FDI inflows in the world in 2020 according to UNCTAD (United Nations Conference on Trade and Development). The financial stability maintained would also help to support the recovery process. According to the data given in the semi-annual Financial Stability Report (FSR) for 2021-22, the dent on balance sheets and performance of financial institutions in India has been much less than what was projected earlier. Stress tests carried out by the RBI (Reserve Bank of India) indicate a limited impact of macroeconomic and other shocks on the Indian banking sector.

It is important to note that while recovery is underway, it is underlined by risks. The relative lack of access of vaccines in developing countries, the rapid spread of the COVID-19 Delta variant and the global spillovers might curb the economic rebound. The rapid re-opening of economic activities in India too raises the prospect of renewed outbreaks. It is to be noted that increase in the COVID-19 cases with variants of concern from 10% in May to 51% on 20 June 2021 in 174 districts can be a cause of worry.

India's debt burden, which has already touched 90% of GDP, is likely to increase if the parliament approves the government demand for additional spending of Rs 236.8 Bn for FY22 which is above the budgeted INR 34.8 Tn announced for FY22 in February. This will lead to excessive cost of servicing if not an immediate sovereign credit ratings downgrade. The high international commodity prices, elevated shipping costs and current inflationary situation in India is a cause of concern. Crude oil prices remain elevated. The revival of monsoon in India is accompanied by extreme rainfall events and this can pose disruption to the sowing activity which is already lagging (till 9th July, kharif crop sowing is 10.4% lower than the previous year), raising concerns over food grain output and consequent food inflationary pressures. The shock to household finances poses a risk to firming up of aggregate demand. Rise in retail inflation above the central bank target range ceiling in May and June 2021 despite the depression in demand, is likely to restrain real incomes. Moreover, household savings are likely to have been depleted by medical expenses. Thus, we do not expect GDP to grow above 8% in FY22 and our outlook reflects the shock to household finances, some pass through of input price to retail inflation, and uncertainty about future pandemic waves.

CASHEW INDUSTRY IN INDIA

Introduction

Cashew ((Scientific Name - *Anacardium Occidentale*) is a tree native of Eastern Brazil, was introduced to the world including India by the Portuguese. In India, cashew was first introduced in Goa (then the Portuguese Colony) in the 16th century. Initially, it was noticed that the tree grew on poor sandy soils along the coastal belt and was used as an anti-soil erosion measure. Thus, cashew tree plantation prospered and spread naturally in Africa and India. Later, it was discovered that Cashew Kernels extracted out of Raw Cashew Nuts (RCN) which is a valuable food and has commercial value. In India, its commercial cultivation began in the early 1960s and today it is crop with high economic value. As per industry sources, a cashew tree is ready for harvest in three years. Presently, India is second largest producer of cashew crops in the world after Ivory Coast. Maharashtra, Andhra Pradesh, Odisha, Karnataka, Tamil Nadu Kerala, and Goa are the major cashew producing states in India.

In fact, India was the first country which started commercial processing of Cashew Nuts and is gradually emerging as the processing hub of cashew. Currently, India's share in global cashew processing is estimated at around 39%, second after Vietnam which accounts 52% share. India is also second largest exporter of cashew kernel after Vietnam and earns considerable foreign exchange for the country. Besides, economic significance, the industry provides employment to more than 1.5 Mn people in farms and factories which are largely in rural areas. The industry thus plays an important role in socio-economic upliftment of the rural India.

Product Overview

The cashew tree produces cashew nut also referred as cashew kernel, an edible kidney-shaped nut, which is rich in oil and protein. Cashew kernels are attached on the exterior of a swollen fleshy peduncle called the Cashew Apple. In its raw state, cashew kernel is covered by a Testa membrane (cashew husk) and a thick outer shell which effectively

guards the kernel from ravages of nature right from harvesting to processing stage. In raw form, the cashew kernel is soft, white, and meaty which require processing. Cashew nut processing include roasting / steaming, shelling, and peeling of raw cashew nuts to extract Cashew Kernels (primary processing) which are further sorted, graded, and packed.

Cashew Kernels, for commercial purposes, are graded based on their color, size, and shape. Grading and packing grading of cashew kernels is done for export purposes-based on number of kernels per pound. These are graded into white/scorched wholes, pieces, splits, butts etc., depending on their shape, size & color. Butts, splits, and pieces are priced lower than the whole cashew and are ideal for cooking, preparation of sweets and savoury snacks. The Government of India Act prescribes 33 different grades of cashew kernels while only 26 grades are commercially manufactured and exported. The specifications for graded kernels are that they should be fully developed, ivory white in colour, free from insect damage and should not have black or brown spots. Packing is done in time by Vita pack method (exhausting the air inside the packing tin, pumping in carbon dioxide and sealing). The major variety of cashew kernel include:

Grade	Specification
W - 180, (super large)	It is the ' King of Cashew ' - They are larger in size and very expensive Between 120 and 180 kernels per lb (266-395 per kg)
W - 210, (large)	are popularly known as ' Jumbo ' nuts. 200 and 210 kernels per lb (395-465 per kg)
W - 240,	it is an attractive grade which is reasonably priced. 230 and 240 kernels per lb (485-530 per kg)
W - 280	270 and 280 kernels per lb (575-620 per kg)
W - 320	are the most popular among cashew kernels and highest in terms of availability, worldwide. 300 and 320 kernels per lb (660-706 per kg)
W - 450,	are the smallest and cheapest white whole kernels 400 and 450 kernels per lb (880-990 per kg)

Scorched wholes are another grade of cashew kernel that are slight brownish in colour due to longer roasting, having all the other characteristics of white kernels and similar nutritional qualities.

Value added product of Cashew Kernel and Cashew Nut

- Cashew kernels are further processed (secondary processing) to produce other cashew-based value-added products such as roasted, salted, and flavored with spices, sugar, cheese, herbs, honey, etc. to satiate the tastebud of different consumers. Cashew powder, cashew paste, cashew butter, cashew drink, are other value-added products. Cashews is also distilled to produce alcoholic drink (Fenny), cashew wine.
- The shells of cashew nut contain a high-quality oil known as cashew nutshell liquid (CNSL), a byproduct which is widely used as an industrial material. Currently, there are more than 200 patents for its industrial application, in particular, its use in acid-resistant paints, varnishes, foundry resins, enamels, and as an insecticides and fungicides. CSNL content of the raw nut varies between 20 and 25 percent.
- Cashew apple is eaten fresh or mixed in fruit salad or a drink is prepared from the juice and is used in preparation of jam, jelly.

MARKET ANALYSIS

Raw Cashew Nut Production

India is the second largest producer of raw cashew nut in the world, and it produced 703 thousand Metric tonnes in 2019-20. The country's annual cashew nut production (raw cashew nut) peaked 836 thousand Metric tonnes in 2017-

18 and it contract by 11% and 5% in the subsequent two year, respectively. The declining production was experienced due to low night temperature for a prolonged period that resulted in less fruit set and translated in less production for Raw Cashew Nut (RCN) in FY 2019, while in 2019-20, unseasonal rainfall and infestation by tea mosquito bug impacted the cashew output. RCN production thus grew at subdued CAGR of 1.2% between 2016-20. In 2020-21, the domestic production of cashew crop was estimated at 651 thousand tonnes, nearly 50 thousand tonnes less from the year ago level as lockdown during the peak harvesting season adversely impacted the crop production volume as well as quality. Moreover, some of crop in the Western region was impacted by the attack of tea mosquito bug and other pests while flowering was delayed, and many trees observed only one flowering cycle. Cyclone and other unfavorable weather conditions in 2019 too impacted cashew output.

Sources: DCCD, Dun & Bradstreet Estimates, *2020-21 Data is estimated

At same time, global raw cashew production is estimated at 3.8 Mn tonnes. Consequently, India's share in global raw cashew production is estimated to be at 17%.

In India, cashew is cultivated in 17 states. Maharashtra, Andhra Pradesh, Odisha, Karnataka, Tamil Nadu, Kerala, and Goa are the major cashew producing states and it accounted for 25.8%, 16.4%, 15.7%, 10.0%, 10.0%, 9.9% and 3.8% share in total cashew nut production during 2019-20, respectively. The total area under cultivation for cashew production stood at 11.25 Lakhs hectares and observed 1.8% y-o-y growth in 2019-20. Nearly 75% of cashew area under cultivation is under private sector, confining mostly to small and marginal holding, contributing 80% of national production. Out of the total area, 33% of existing areas have crossed 40 years of life thus impacting the overall productivity or yield. DCCD under MIDH has undertaken area expansion and replanting senile plantations with high yielding varieties to increase the domestic RCN production. During 2019-20, an additional area of 19.7 thousand hectares was brought under the cashew cultivation with high yielding varieties while 2,752 Ha old and senile cashew plantations was replaced and replanted with high variety seed.

Economic Importance of Indian Cashew Sector

- India is the second largest producer of raw cashew and exporter of cashew kernels in the world. India accounted for 15.1% share in global cashew production (2020) while its average share in global cashew kernels export stood at ~15% share (2015-19).
- India is also the largest cashew consumer and accounted for 32% share in global cashew consumption in 2019.
- Area under cashew attained 11.25 lakh ha in 2019-20
- Production of raw nuts reached 7.03 lakh MT.
- Export earning of cashew kernel reached INR 29.1 Bn in FY 2021
- The industry support employment for more than 1.5 million people in Cashew sector.
- 47 model Cashew Nurseries are functioning for planting material production.
- Thirty-seven high yielding varieties of cashew are available for adoption.
- Area with clones of high yielding varieties reached 3.92 lakh ha.
- Generation of clones reached 12 million per year.

Indian Cashew Processing and Raw Material Supply Scenario

In terms of processing capabilities India stands second to Vietnam. According to the Directorate of Cashew and Cocoa Development India, as of March 2020, nearly 4000 processing factories are engaged in cashew sector with processing

capacity of 1.7 Mn metric tonnes raw cashew nuts both in organized and unorganized cashew segment. During 2020-21, India's cashew kernel production stood at 166 thousand tonnes, it observed a decline of 6% on y-o-y basis.

*2020-21 data is estimated

Below industry statistic reveal, against the available capacity of nearly 1.7 Mn metric tonnes, India is estimated to have processed 1.46 Mn tonnes of raw cashew in 2020-21.

The above statistic also highlights India's dependency on the import of raw cashew nut to support the domestic cashew processing and millions of livelihoods associated with the sector. The country's RCN imports accounted for average 54% share of the industry total domestic RCN supply which was used for the processing sector during the above period (above calculation excludes carryover stock). As per other recent estimates, India needs to take its cashew crop cultivation from the existing 7 lakh tonnes per annum to at least 12 lakh tonnes per annum in the next five years to become Atmanirbhar in cashew crop production. Moreover, Industry experts suggest, India needs to process at least 2 Mn metric tonnes of cashew annually to become a global processing hub for cashew. For comparison purpose, India in 2019 processed around 1.4 Mn metric tonnes of cashew in comparison to 1.9 Mn tonnes processed by Vietnam.

Cashew Roadmap 2025

Projecting the increasing gap between domestic production and demand requirement of RCN based on historical growth rate number, CEPCI has suggested Cashew RoadMap 2025 to secure self-sufficiency in domestic supply. Area expansion and replanting old and senile trees with hybrid varieties along with improved pre harvest management method are major areas of focus to attain the above target. Based on following assumption, a 2025 Cashew roadmap

targets to increase the total raw cashew production to 21.42 lakh tonnes against the estimated demand 21.9 Lakh tonnes by 2025.

- 25% increase in area over the existing area of 10 Lakhs Hectares was projected from 2017 onwards in three phases. A total area expansion of 2,50,000 is planned to be achieved in three phases i.e., 75,000 Hectares in 2017, 85,000 Hectares in 2018 and 90,000 Hectares in 2019.
- Improved yield of 10kg/11.25 Kg /12.5 kg is taken as assumption for Third/Fourth /Fifth year onwards
- A replanting of 200000 hectare of land over a span of 4 years after the area expansion plan is executed. i.e., from 2020 to2023 with total 80% achievement level starting with 20% of 200000 from 2020 onwards was projection.

The above roadmap is planned to be implemented in major cashew producing states. Maharashtra, Kerala Andhra Pradesh, Tamil Nadu, Odisha, Jharkhand, Karnataka & Goa while the Cashew Export Promotion council along with other institutions/department such as the DCCD, the cashew Research centers across the country and The State Agricultural Department have been identified as implementing agencies. CEPCI estimates the above plan to translate in higher cashew nut yield in India from the current 650-700 kg per ha to over 3,000 kg per ha.

FOREIGN TRADE

Cashew market in India is an export-oriented Industry. With average 15% share in the world export between 2015-19, India is the second largest exporter of cashew kernels in the world after Vietnam. The Indian cashew kernels are well applauded for its superior quality, taste, and appearance. India remained a net exporter of cashew kernel between FY 2017-21. Around 97% of Indian exports of cashew kernel are in plain form (average 2017-21 by volume) and in bulk packing while export of value added / consumer packs accounts for remaining 3% share.

India's annual export value and volume of cashew kernel reached INR 29.1Bn and 50.3 thousand tonnes in FY 2021, respectively. However, India's export of cashew kernel has been falling steadily over the last few years as Vietnam is aggressively expanding as major exporter of the commodity. The rate of contraction in India export earnings have been in the range of 12-25% between FY 2019-21. In FY 2021, the cashew nut kernel exports fell by 25% against 13% decline in FY 2020 while in volume terms, it fell by 26% as compared to 2% increase in the previous fiscal.

Indian cashews are consumed in more than 90 countries of the world. In FY 2021, UAE, Saudi Arabia, Japan, Netherlands, Spain, and US remained India's major export market for cashew kernel exports.

On import side, the country has miniscule import relative to export of cashew kernels. India's import of cashew kernel observed falling trend after touching the peak in FY 2019. During FY 2021, India's cashew kernel import fell by 36% in value term and 40% in volume terms against 13% decline in value and flat -0.1% decline in volume during the previous fiscal. Increase in import duty on cashew kernels from 45% to 70% in 2019 to restrict import and support domestic cashew industry resulted in reducing import. In FY 2021, high import duty along with Covid-19 induced depressed market demand impacted India's cashew kernel imports. Being the largest exporter of cashew kernel, Vietnam also emerged as India's single largest import partner for cashew kernel import. In FY 2021, the country accounted for 90% of total import value of India cashew kernel imports.

India's net export of cashew kernel by value and volume fell to INR 27.5 Bn and 47.1 thousand tonnes in FY 2021, declining at a CAGR of 14% and 12% between FY 2017-21, respectively.

Trade in Roasted & Salted Cashews

India is also a net exporter of value-added cashew product i.e., roasted & salted cashew nut which have observed fluctuating trend between FY 2017-21. During FY 2021, India's export of cashew kernel and roasted & salted kernel declined by 8% on yearly basis against 40% y-o-y growth in the previous year while in volume terms same declined by 4% against 44% y-o-y growth in the previous year. Between FY 2017-21, the export of roasted and salted cashew from India has declined at 1% CAGR by value and -6% CAGR by volume. The USA remained India's single largest export destination in FY 2021 with 89% share in roasted and salted cashew nut export from the country.

On import side, the country has miniscule import relative to export. After witnessing a steady growth in imports between FY 2017-19, India's import of roasted and salted cashew nut fell sharply in the subsequent two year due to the softening demand in the domestic market. Moreover, government announced hike in basic custom duty too from 30% to 45% in FY 2017 to keep a check on imports and support domestic players.

India's Trade in Raw Cashew Nut

In the wake of low domestic production volume in comparison to domestic processing capacity of cashew nut, India cashew processing industry is heavily dependent on imports. The country imports nearly 54% of its Raw Cashew Nut requirement from other countries especially from West Africa. Globally, Vietnam and India are the two largest

importers of the raw cashew nut. As per International Nut and Dried Fruit Council, India accounted for 43% share in global Raw Cashew Nut import as compared to 52% share of Vietnam in 2019.

Between FY 2016-18, imports of Raw Cashew Nut in India fell sharply from 958 thousand tonnes to 649.4 thousand tonnes owing to imposition of 5% BCD in March 2016. Imposition of 5% BCD also coincided with steady rise in RCN prices to reach its peak at USD 1,800 per tonne in the international market primarily due to sharp growth of cashew processing industries in Vietnam. Meanwhile, RCN demand from domestic cashew processing units fell sharply as they faced heavy losses due to increasing cost and started defaulting on their bank loan. 2.5% reduction in BCD announced in February 2018 provided temporary support which resulted in growing import in the subsequent two years. But the domestic cashew processing units again confronted a difficult situation owing to subdued price realization of finished product during Covid pandemic times. As a result, input requirement and processing volume declined during FY 2021. In FY 2021, India's RCN fell by 11% by volume and 16% by value to reach 831.2 thousand tonnes and INR 73.3 Bn.

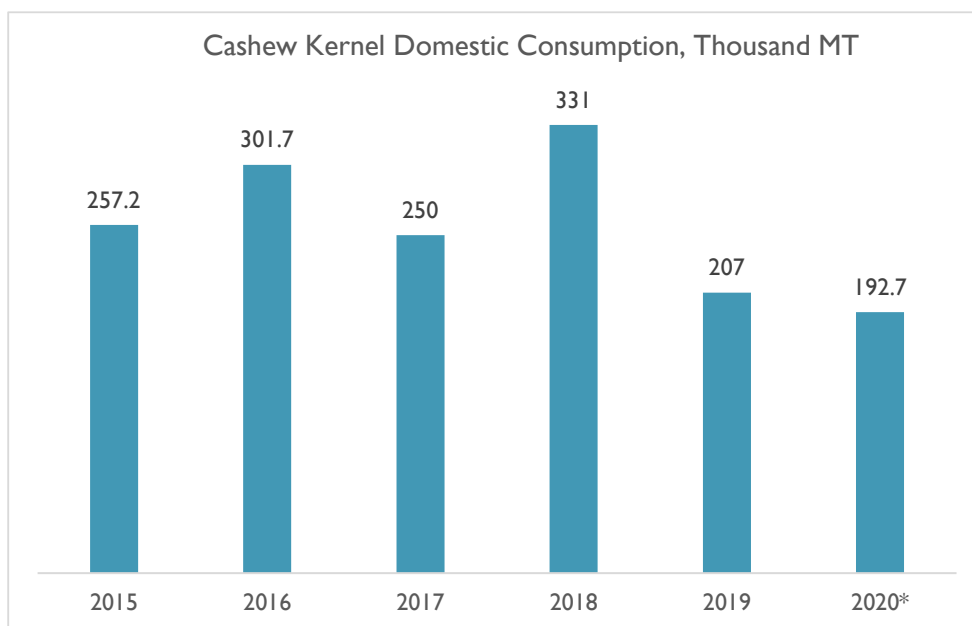

In FY 2021, Benin, Ghana, Guinea Bissau, Cote D' Ivoire, Tanzania Rep emerged as India key import partner for Raw Cashew Nut import. Together, these countries accounted for 70% share in India total import of Raw Cashew Nut.

Since, India is primarily an importer of Raw Cashew Nut its export is miniscule relative to import. But the country does have some exports in Raw Cashew Nut. In FY 2021, India's export of Raw Cashew Nut observed 37% y-o-y increase value terms against 1% increase in the previous year while in volume terms it was up by 22% against 43% y-o-y growth. Between FY 2018-21, India export of Raw Cashew Nut have observed steady growth and have increased at CAGR of 44% and 52% by value and volume respectively while between FY 2017-21 the CAGR stood at 11% and 19%, respectively. India's annual export earnings from Raw Cashew Nut stood as INR 2 Bn against the export volume of 19.8 thousand tonnes.

DEMAND SCENARIO

On consumption side, India continued to be the largest consumer of cashew kernel globally with annual estimated consumption of 192.7 Thousand tonnes in 2020. The country's per capita cashew consumption stands at 0.15kg per year (2019) against the global average of 0.11 kg/year. As per INC number, the country's domestic consumption of cashew kernels has remained in the range of 207-329.4 thousand tons between 2015-19 while in 2020 it is estimated to decline by 7% on annual basis. Covid induced decline in demand in catering and unorganized sweets segment due to lockdown and strict containment measures is believed to have impacted in overall cashew kernel consumption in India.

Sources: International Nut & Dried Fruit Council, Dun & Bradstreet Estimates, *2020 data is estimated

In FY 2020, the size of the Indian cashew market valued INR 207 Bn which is slated to reach INR 265 Bn by March 2025, registering 5% annual growth during the above period. The cashew kernels are widely used for direct consumption and are commercially procured by players in HOCERA segment, sweet preparation, confectionery product, and dessert. Simultaneously, the market for processed-valued added cashew products is expected to grow at relatively higher rate of ~9% as consumption of salted, and assorted cashew is increasingly finding place in Indian consumer basket. The country being second most populous country in the world, provide huge consumption base for many products including processed food products. Favorable demographics, rising urbanization, growing income, changing lifestyle, and growing hygiene awareness etc., amongst other has fueled the growth of confectionary products, sweet & salted items translating in the rising domestic consumption of Cashew. The cashew consumption in India is mostly for 'Broken' grades which is largely used as ingredients in food items, sweet preparation, amongst other and is used by the biscuit and the confectionary industry. Thus, domestic processor is thus equally focusing to tap the domestic market opportunity along with exports.

GROWTH DRIVERS

Access to Huge population base and Improvement in Affordability

India is the second most populous country in the world, home to one sixth of world population. Urban population increased from 278 Mn to 373 Mn during the past decade (2001-11) and the proportion of urban population to total population increased from ~27.8% to ~31%. In the last decade, urbanization in India has increase at an average annual rate of about 2.4%. The share of urban population is further estimated to grow to about 35% of Indian population i.e., ~470 Mn by 2021 and later to 41.7% i.e., to 625 Mn by 2030 where 5 state in India namely Tamil Nadu, Gujarat, Maharashtra, Karnataka, and Punjab will have more than 50% urbanization. Also, the number of metropolitan cities in India is projected to increase from 46 in 2011 to 68 by 2030. Increase in urbanization is directly related to the rise in service sector and the jobs created resultantly. Rapid urbanization and better employment have resulted in increasing per capita private consumption expenditure. Consequently, this growth in income has strengthened the demand for various premium nuts including cashews.

Increasing Urbanization- Lifestyle and Aspirations

Changing lifestyle, new food habits prevalent in the country are witnessing a shift because of urbanization and demographic changes. Increase in disposable income on this population mix because of better access to jobs has helped in increasing the affordability of processed frozen foods products. A youth centric population tends to prefer value added processed food over unprocessed food due to increased product and health awareness.

Rise in disposable incomes & Increasing spending on food products

India's per capita income has grown steadily, leading to an increase in disposable incomes. Rising income growth has supported the increased spending on food products. On average, Indians spend 31 % in their general earnings on groceries and food items.

Changing dietary habit towards healthier food option:

Cashew due to its nutritional benefit has gained much popularity as a part of healthy dietary habits amongst consumer and is also considered as a healthy gifting option on festive and on other several occasion. Moreover, the demand for organically grown nuts is observing a growing demand amongst consumer ranging from middle to high income group. This has stimulated the processors to source their raw cashews from organic farms.

Increasing demand for packaged food

The packaged snacks item has got a major boost during Covid-19 Pandemic time where industry registered a healthy double-digit growth as consumers stockpiled on essential goods during the lockdown and due to hygiene and safety issues. During pandemic, the definition of essential food items has changed from basic food to snacking and munching items. As large section of population is working from home and with growing health awareness, demand for tasty at same time healthy munching snacks item has increased. Moreover, with even more emphasis on hygiene, consumers are preferring packaged food which with minimum human handling offer safe treat to consumer. Growing demand for the packaged food is expected push the share of organized players in cashew processing business.

Aggressive promotion by FMCG Companies

Huge advertising efforts and promotional activity by way of product sampling, price promotion has been adopted by processed food companies to entice the consumer. This has led to the steady growth of the processed food products. Further, to cater to the low-income consumers, major food processing companies introduced lower priced small sized packs. Most of value-added cashew snacks product are packed in size of 100-300 Gram, 301-500 Gram, 500 Gram while cashew kernel is packed starting from 100-1kg for retail customer. This helped increase the product reach

particularly among consumers in small cities where the affordability is relatively low. This strategic initiative by the players in the segment fueled the growth of the sector.

Growth of Organized Retail and Private Label Penetration

Current generation have better access to processed foods when compared with the previous generations due to better distribution reach. In urban areas, the spread of organized retail format stores has helped in increasing the distribution increasing penetration levels of organized food retail outlets are offering a wide range of options to consumers. Organized retail outlets allow consumers an access to a diversified range of products coupled with attractive discounts. Growth in organized retail have translated into an increase in better display cabinets throughout India which has benefitted the packaged food item including processed cashew. Organized retail expansion in tier two and tier three cities are expected to push the demand growth further. In rural areas too, realizing the increasing income levels, companies have increased their investments in setting up large distribution networks, thereby assuring better accessibility to processed foods in rural areas.

However, Coronavirus (COVID-19) outbreak observed significant impact on point-of-sale channel. Triggered by the compulsory lockdown, when supermarket/hypermarket operations remain suspended during covid pandemic, local shops and online shopping have gained importance. Consumers in order to avoid the risk of getting infected have shifted away from shopping centers and resorted to e-commerce channel or resorted to local kinara shop for daily groceries need.

MAJOR CHALLENGE

Shortage of the Raw Cashew Supply

Currently, India is largely dependent on import of RCN to fulfill the demand requirement of domestic cashew processing sector. Going forward, as per CEPCI Roadmap for 2025, the country's projected domestic production of raw cashew is estimated to grow to 8.89 Mn Metric tonnes against the demand of 21.9 Mn metric Tonnes leaving a gap of 13.01 Mn Tonnes by 2025. This consumption growth is based on analysis over the last two decades (1995-2015) which reveals the country's RCN demand for processing has increased at a relatively higher rate of 5.3% against 3.1% growth registered by the domestic production. This estimated shortage of 13.01 Mn Tonnes by 2025 need to be addressed either by imports and/or enhanced domestic production. Moreover, the leading supplier of raw cashew nut to India are enhancing their in-house processing facility which will raise raw cashew demand in competing country. This is likely to affect its availability in domestic market and viability of domestic cashew processing industry. Thus, to attaining self-sufficiency in domestic raw cashew nut productions, DCCD has initiated various schemes, activities, and training programmes working towards expansion of area under cashew cultivation as well as improvement on productivity. However, even after best effort, benefit of above is not reaching farmers across India due to lack of resources. To avail the potentials of above efforts, industry consultant view setting up of regional cashew boards through which apex institution could expand its reach in remote areas.

Disruption in Global supply, Fluctuation in Input Cost, and lower realization for cashew kernel

Since India is an importer of RCN, any disruption in global supply has direct impact on domestic procurement and profitability of cashew processing sector. Domestic cashew processing business may face challenges on account of a rising input cost or lower realization of cashew kernel -a situation which domestic processing units have experienced on multiple occasions earlier.

During 2020, the value addition activities in India was severely affected due to demand disruption during Q2 and Q3 on account of Covid and subsequent lockdown. Slowing demand of broken grades continued to remain a challenge for major producing countries due to fall in consumption in two major end using segment- HORECA and un-organized snacks and sweets. As a result, kernel prices dropped to 5-6 years low in India in 2020.

On input supply side, RCN prices fell to 5-6 years low in 2020 amidst weak demand. RCN prices were almost 50% during (April/May-2020) from the level of Rs 100-130 per Kg during January 2020 as domestic processing units were not fully operational due to Covid-19 and processing volumes saw reduction. Although it recovered slightly by 30% during the end of 2020 but again fell sharply to settled at around Rs 50-80 per kg during July 2021. The sharp reduction in raw cashew nut is having an adverse impact on the cashew farming community. Thus, domestic cashew crop farmers are continuously urging for Minimum Support Price of 150 per Kg to sustenance.

In past, raw cashew nut prices have doubled from INR 45-50 per kg to INR102 per kg between 2007-08 to 2014-15. Rising RCN prices increases the input procurement cost while falling prices of processed cashew kernel impacts the top line number, thereby adversely affecting the financial viability of the processing unit.

Smooth Availability of Raw Cashew Nut in Domestic Market

As India is dependent on import for input supplies, there exists significant risk to smooth movement of RCN amidst unanticipated and rarest event like Covid-19. Pandemic outbreak resulted in subsequent lockdown across many countries and had a disrupting impact on supply chain translating in rising logistic cost which added additional concern for domestic cashew processing units. Moreover, the leading supplier of raw cashewnut to India are also enhancing their processing facility which may translated in rising internal consumption of RCN in their native land and may risk smooth availability of RCN to India in future.

Custom Duty on Raw Cashew Nut

As seen in past, basic customs duty @ 5% was imposed with effect from 1st March 2016 which adversely affected raw cashew availability for domestic processing industry. As a result, around 80% of the cashew processing companies saw closure between 2016-2018 which also impacted the export performance of the domestic cashew processing units. India's exports of cashew kernel observed 15% decline during FY 2017, falling from 96.1 thousand tonnes in FY 2016 to 82 thousand tonnes in FY 2017. Addressing the concern of domestic cashew processing unit, the center announced reduction in basic custom duty from 5% to 2.5% in interim Union Budget 2019-20 during July 2019. Domestic processing units are further seeking exemption of BCD on raw cashew nut amidst fluctuation global cashew prices and depreciating rupee value in the past few years that has contributed to high cost of operation.

High Cost of Production

As per industry sources, the cost of production in India is almost double than the cost of production in Vietnam due to higher cost of labor, inadequate export incentive and low automation level in domestic cashew processing sector. This has impacted the financial viability of many domestic processing units in India and resulted in accumulating losses and default on bank loans. Meanwhile, taking an advantage of existing price un-competitiveness in India, competitors primarily Vietnam has aggressively expanded its penetration in the global cashew market.

High Input-Output Ratio norm

Although, the government revised SION for export of Cashew Kernel from imported RCN to 1 kg kernel from 5.04 kg of RCN as against earlier norms of 1 kg kernel from 4 kg under Advance Authorization Scheme in July 2017 but the revised ratio is still higher than the required ratio of 1:6 (as per Mission 2020 document by CEPIC)

Competition from other producing countries

India is increasingly facing tough competition from Vietnam in cashew processing segment. Since 2017, the country has emerged as largest processing hub accounting for nearly 50% share in global processed cashew nuts. In 2006, the country surpassed India to become the world largest exporter of cashew kernel. The country is steadily gaining ground in the US market- the world largest importer and India's leading export destination for cashew kernel. Between FY

2017-21, India's cashew kernel export to US market has steadily declined from 17,400 Metric Tonnes to 2447.76 Metric Tonnes, declining at 39% CAGR. During the above period US share in India cashew kernel export has decline from 19% to 3%. In contrast, US cashew kernel imports have been steadily growing and it observed nearly 3% CAGR growth between 2014-19. In 2019, US received 86% of the cashew kernels from Vietnam.

Stringent factories & labour laws

Over the years, India has laid down stringent factory and labour laws. Since, majority of cashew processing units fall in SME and in cottage sector, they find it difficult to comply with stringent wage laws, fire safety requirements, effluent treatment etc.

Misuse on Imports of Cashew Kernels

In past, the domestic cashew industry has observed a surge in import of plain cashew kernels (between FY 2017-19) into the country which are mis-declared as roasted cashew as it attracts zero duty under various Free Trade Agreements. At times, while importing cashew kernels for re-export, broken cashews are mis-declared as wholes and sold in the domestic market for a premium. In addition to above, broken cashew is regularly imported by mixing them with cashew husk which is declared as husk. Such manipulation in product declaration adversely impacts the genuine processors or exporters operating in the industry.

In addition to above, working capital shortage, penalty for late clearance of cargo, occasional denial of LDC benefits for traded goods and high export incentive along with funding support from international agencies in competing cashew planting countries are other major challenges that directly impacts overall domestic cashew industry.

Competitive Scenario

Cashew nut needs to be processed before selling to ultimate consumers. Therefore, cashew processing units play an important role. The processing units are mainly concentrated in the states of Kerala, Tamil Nadu, Karnataka, Goa, Andhra Pradesh, Maharashtra, and Orissa. Currently, nearly 4000 processing factories are engaged in cashew sector with processing capacity of 17 Lakh metric tonnes raw cashew nut both in organized and unorganized cashew segment. The cashew processing is a highly labor-intensive activity and employ nearly 1.5 million people with workforce primarily comprise of women. The processing unit procure raw cashew either from the farmers in domestic market or import it. Few of the large domestic players in organized segment have also purchased cashew cultivation plant in west African region to secure supply for processing business.

State-wise share of processing units and installed capacity

State	Processing Units (Nos)	Share of processing units (%)	of Installed capacity (000 MT)	Share of installed capacity (%)	Average installed capacity

The manufacturers in cashew processing in the organized segment largely compete in terms of quality, taste of a product. Cashew processing units are also experimenting with several flavors such as salted, spiced with red chilli, black pepper, cheese coated cashew nuts, amongst other as strategy to enter in the packaged snack market segment.

While efforts are also made by the manufacturers to adopt attractive and innovative packaging style as it too influences the buying decision Indian consumer to great extent. Currently, the processed cashew products in retail market are available in various packaging material. These are widely sold in a sealed vacuum packages with zip-locks, in glass bottles, in tins, and in regular packages. Major Key players operating in organized value-added cashew product in Indian cashew markets are Kalbavi Cashews, Sunorganic Industries Pvt. Ltd (brand Wonderland Foods), Britannia Industries Limited and Haldirams, amongst other. Multiple other processing companies are engaged in secondary processing of cashew-based product in unorganized segment and have launched their own private label to tap the growing demand. Leading players in organized segment have launched nutritional product range to tap the growing opportunity for healthy snacks which is likely to have a positive impact on cashew demand from value added product segment.

Currently, there are nearly 180 exporters registered with Cashew Export Promotion Council of India and engaged in export cashew kernel and allied cashew products to countries across the world.

Covid Impact on Cashew Processing Units

The immediate impact of Covid pandemic on the cashew processing industry was the disruption in both demand and supply. Both consumption and supply experienced a massive setback due to COVID-19 pandemic as evident from industry statistic covered in the previous section. Spread of the pandemic has forced Governments across the world into forced quarantine, which also included closure of factories, industries, centers of economic activities and suspension of passenger transports. In the case of cashew, there is a huge concentration of cashew production happening in West and East African Countries with India importing close to 55-60% of RCN from West African countries. All these countries enforced a lockdown, leading to a sudden disruption of RCN supply in domestic market with declining inventory level available with processing units for production. A good amount of stock got stuck at various processing stage due to sudden lockdown. As per industry sources, almost 2000 individual who visited African countries to purchase raw cashew prior to the lockdown got stuck in those countries due to initial lockdown. Consequently, regular business operation of cashew processing unit was severely affected. Nearly 90% of the processing facility in Kerala which account for majority share in cashew processing (nearly 55%) remained shut. Consequently, India's cashew processing volume level fell sharply during H1 2020 which also impacted India's overall export of cashew kernel in FY 2021.

Later, domestic processing units outside the limits of municipal corporations and municipalities were allowed to operate after April 20, 2020 and the subsequent relaxation helped the units to resume operation gradually.

On the demand side, the closure of HORECA, shopping malls, sweet shop both in organized and unorganized, together with forced lockdown led to a disruption in demand and had a consequent impact on falling cashew demand. Moreover, cashew export too felt the heat of pandemic and fell sharply in FY 2021 as domestic processing business was severely affected. As per the estimates of Cashew Industry Protection Council, Kerala, India lost nearly INR 40-50 Bn business during the initial two months of lockdown while nearly 400 processing units in Kerala faced shutdown since lockdown (until Nov 2020) which left thousands of skilled laborer's jobless and operating units in deep financial crises.

SWOT of Indian Cashew Processing Sector

Strength: <ul style="list-style-type: none"> • Strong presence and long experience in the international cashew market • India is leading producer of raw nuts. • Second largest exporter and processor of cashew nuts • India has huge access to captive domestic market vis-à-vis Vietnam and is high potential market for Broken cashew Nuts • Good availability of skilled worker • Diversified production base. 	Weakness: <ul style="list-style-type: none"> • Strong dependency on Import for input (RCN) procurement for supporting processing business. • Low productivity due to sustaining inadequacies in domestic cashew plantation sector. • Lack of level playing field against global competitors. • Low level of mechanization. Large number of units operate as SMEs and cottage business are part of unorganized segment. • High processing costs • Low share of secondary processing in value chain.
Threat <ul style="list-style-type: none"> • India's being largest consumer and export, any disruption in domestic demand and export and has direct bearing on financial health of domestic cashew processing industry. • Highly subsidized production inputs and external funding in competing countries cashew plantation countries • Fluctuations in global supply and raw material prices • Cashew crop growing countries entering cashew processing segment. Low RCN cost and processing cost in crop producing country is likely to have significant bearing on Indian cashew processing sector. • China is the captive and growing market for Vietnam. The country imports almost entire cashew kernel from Vietnam. • Imposition of stringent quality standards by major importing countries • Value added cashew product compete with several other processed value-added product in snacks sector which are relatively cheaper. Government Scheme to Strengthen Domestic Raw Cashew Nut Production:

Department of Agriculture, Cooperation and Farmers Welfare (DAC&FW) has approved the roadmap programme of DCCD to expand the area of cashew cultivation by 1.20 lakh hectare. To boost the domestic production of cashew, the developmental activities are being augmented in all the traditional and non-traditional states while Cashew is covered under various centrally sponsored programmes such as Mission for Integrated Development of Horticulture (MIDH) and Remunerative Approach for Agriculture and Allied sector Rejuvenation. Various development measure such as area expansion, replanting, rejuvenation, use of high yield variety, training programmes, financial assistance is provided to boost domestic production. Though the country still depends on the RCN imports but above scheme has yielded encouraging result in the past. As per DCCD data, the area under cashew cultivation has increased from 7.99 lakh ha to 11.25 lakh ha while the cashew production has increased from 5.44 lakh metric tonnes to 7.03 lakh metric tonnes between 2004-05 to 2019-20.

The Cashew Export Promotion Council of India (CEPCI)

The Government of India established The Cashew Export Promotion Council of India (CEPCI) on 17th August 1955 that work to promote exports of cashew kernels and allied cashew products. The council serves as an intermediary between foreign importer and domestic exporters for its member. It disseminates market information and trade related data to its members and encourage free participation services in the council's stall at international trade event. It also provides support to processors and cashew exporters in India for improving infrastructure. Beside above, the Council amicably resolves any disputes on export/import arising due to quality standards and breach of contractual obligations and works to promote Indian Cashew brand in global market.

2025 Target

- To regain the prime position as the world's largest exporter of Cashew kernels.
- Enhance the share of value addition to 10% in our total exports.
- To achieve self-sufficiency in raw cashew nut production by producing 20.00 lakh Mt.

The Food Safety and Standards Authority of India (FSSAI) standard applicable for cashew product

The Food Safety and Standards Authority of India (FSSAI) established under Food Safety and Standards Act, 2006 govern by Ministry of Family Health & Welfare government regulates the sale of food items in India to ensure its safe and hygiene. The institution performs quality checks to ensure the stringent safety guidelines being followed are being followed by the food business. Cashew being a part of broader food industry are covered under FSSAI standard. FSSAI has specified certain standard for cashew processing with respect to moisture content, acid-insoluble ash, defect tolerances, free fatty acid, and peroxide value. To ensure the quality of the cashew kernels. As per FSSAI directive released on 27th October 2017, Raw cashew imports are exempted from FSSAI clearance as raw cashewnut is a not an edible item and require processing.

Major Initiatives

Loan to food and agro based processing units & cold chains has been classified under agriculture activities for priority sector lending. This has helped FPI sector to receive funding at concessional rate.

FDI in Food Processing Sector: Government has permitted up to 100% FDI under automatic route in all processed food segment except for items reserved for Micro and Small Enterprises (MSEs). For manufacture of items reserved for MSEs, FDI is permissible under automatic route up to 24% of the capital. Automatic Government approval is also provided for projects which involve technology transfer to the local partner.

The government has also allowed 100% FDI in food trade including e-commerce of the food produced and manufactured in India.

The Ministry of Food Processing Industries has set up autonomous institutions such as National institute of Food Technology, Entrepreneurship and Management (NIFTEM) and Indian Institute of Food Processing Technology (IIFPT) to support research and development projects in the Food Processing industry.

Dedicated NBFC for FPI: The government plans to set up Financial Institution which will exclusively fund food processing projects. The proposed NBFC will have 20% stake owned by government while 80% stake will be owned by private sector. The institution will have a budget of INR 20 Bn for two years.

Make in India Scheme

The food processing sector was recognized as one of the 25 concentrated areas under the Government flagship Make in India Scheme. Therefore, the policy, ecosystem has been refurbished to draw financial, technological, and human resources into the zone. Allowing 100% FDI via automatic route into this sector is also an important footstep in this direction.

PM Formalization of Micro Food Processing Enterprises (PM-FME) Scheme

The PM-FME scheme was launched on 29th June 2020 as a part of the Atmanirbhar Bharat Abhiyan and the “Vocal for Local” campaign. PM-FME is a centrally funded sector scheme with an aim to provide financial, technical, and business support to micro food processing units in the country. The total outlay of the scheme is USD 1.3 Bn spread over a span of 5 years from 2020-21 to 2024-25.

Production Linked Incentive (PLI) Scheme

In November 2020, The Union government has launched the Production-Linked Incentive (PLI) Scheme in the 10 key sectors including food processing industries for Enhancing India’s Manufacturing Capabilities and Enhancing Exports under the “Atmanirbhar Bharat” programme. The Approved financial outlay for five years period for MOFPI is INR109 Bn.

The funding under the scheme will be shared by the Centre and State governments in the following ratios:

- For States and UTs with legislature: 60% by Centre and 40% by State/ UT
- Himalayan and North Eastern States: 90% by Centre and 10% by State
- UTs without legislature: 100% by the Centre

Technology Upgradation Scheme

Under this Scheme, Ministry extended financial assistance for setting up of food processing units, in the form of grants-in-aid to the implementing agencies/ entrepreneurs at 25% of the cost of plant & machinery and technical civil works subject to maximum of INR 5 Mn in general areas and 33.33% up to a maximum of INR 7.5 Mn in difficult areas.

Other development initiatives include:

- Promotion of cluster-based development of agriculture commodities.
- 100% income tax deduction to Food Processing Organizations (FPO’s) having an annual turnover of INR 1.1 Bn derived from post-harvest value addition activities.
- To strengthen quality benchmarks, there will be setting up of state of art testing facilities in all 42 Mega Food Parks.

GST Rates

As per the latest revision in the GST rates, of all food categories taken together under different chapter heads/subheads, 36% of the food items have been exempted from GST (0%) and 37% of the food items shall attract GST of 5%. Hence, almost 73% of the food items are under lowest tax slab of 0% or 5%. Goods and Service Tax (GST) on cashew nut has been reduced to 5% from 12%.

Applicable Duty Structures

- To support the domestic cashew industry, basic custom duty (BCD) on import duty on raw cashew nut was reduced from 5% to 2.5% w.e.f. 1st February 2018. Earlier, the government imposed 5% BCD with effect from 1st March 2016 which badly affected the availability of raw material for processing and their sustenance. The cashew

processing units are further seeking withdrawal of 2.5% BCD on RCN to support to reduce their cost of operation. Currently, duty free import of raw cashew nuts is allowed only under Duty Free Tariff Preference (DFTP) Scheme from Least Developed Countries (LDCs).

- In July 2019 (interim budget 2019-20), the government hiked import duty on cashew kernels to 70% from the 45%. Also, the request to withdraw 2.5% import duty was not addressed.
- Roasted cashews attract zero duty under various Free Trade Agreements

Recent Announcement

Recently, the government of India suspended the Cashew Export Promotion Council's power to issue or renew Registration-Cum-Membership Certificate (RCMC) for cashew kernels, cashewnut shell liquid and kardanol on 14th June 2021 and has designated Agricultural and Processed Food Products Export Development Authority (APEDA) for the same with immediate effect. Following this, the exporters registered with CEPCI must get their RCMC endorsed by APEDA and procedure for the same has been published on APEDA website (Reference no: REG-2021-22-00008 Date: 30th June 2021). The board issue RCMC to cashew companies that help them to avail duty benefits under the foreign trade policy and help in export-related works

OUR MANUFACTURING PROCESS

The processing of raw cashew nuts into finished cashew kernels involve following steps:

• Procurement of Raw Material

The major raw material in manufacturing raw cashew nuts into finished cashew kernels is procured from local farmers

and suppliers from Konkan and adjacent area and majorly imported from Indonesia and some African countries like Benin, Ghana, Guinea Bissau.

- **Drying**

The raw cashew nuts have to be sundried till moisture in the raw cashew nuts comes down to 8% so that it becomes usable. The nuts are rolled over on regular basis in order to ensure uniform drying. This process removes excess moisture from the nut.

- **Boiling**

An outer shell covers the edible cashew kernel. The process of steam roasting helps in the removal of this shell with minimal effort. Steam is passed over the raw cashew nuts placed in the roasting drum for about 15 minutes. A boiler is used in this process for steam generation.

- **Shelling**

After boiling, raw cashew nuts undergo shelling process. Raw cashew nut has a unique kidney shape. Moreover, the outer shell of raw cashew nut is very hard to crack. The shell contains a liquid called CNSL, which can be very dangerous if not properly handled. Shelling machines separate cashew shell and unblanched cashew kernels.

- **Separation of Shell and Kernel**

After shelling process, the shell and kernel get separated. Kernel has to be kept in dryer 8 hours to soak the oil from it to make it edible.

- **Peeling**

7. Property Plant and Equipment

Tangible assets

Property, plant and equipment are stated at cost net of recoverable taxes, trade discounts and rebates less accumulated depreciation and impairment loss, if any. The cost of Property, plant and equipment comprises its purchase price, borrowing cost and any cost directly attributable to bringing the asset to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

Subsequent expenditures related to an item of Property, plant and equipment are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. Projects under which assets are not ready for their intended use are disclosed under Capital Work-in-Progress.

Depreciation

Depreciation on tangible assets is provided on written down value (WDV) at the rates and in the manner prescribed In Schedule II of the Companies Act, 2013.

Impairment

In accordance with AS 28 – Impairment of Assets, the carrying amounts of the Company's assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. For assets in respect of which any such indication exists, the asset's recoverable amount is estimated, at higher of the net selling price and the value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. An impairment loss is recognized whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. If at the Balance Sheet date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reinstated at the recoverable amount subject to a maximum of depreciable historical cost.

8. Foreign currency transactions

Initial recognition

Transactions in foreign currency are recorded in the reporting currency by applying to the foreign currency amount the exchange rate prevailing on the date of the transaction.

Subsequent recognition

Monetary items denominated in foreign currency as at the balance sheet date are converted at the exchange rate prevailing on that date.

9. Inventories

Inventories are valued at lower of cost or net realisable value. Cost includes freight and other related incidental expenses net of recoverable duties and taxes, if any and is arrived at on weighted average basis. Net realisable value is the estimated selling price in the ordinary course of business, less estimated cost to affect the sale.

10. Income Taxes

Income-tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income-tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period). Income-tax expense is recognised in Statement of Profit or Loss except that tax expense related to items recognised directly in reserves is also recognised in those reserves.

Current tax is measured at the amount expected to be paid to/ recovered from the taxation authorities, using the applicable tax rates and tax laws.

Deferred tax is recognised in respect of timing differences between taxable income and accounting income i.e. differences that originate in one period and are capable of reversal in one or more subsequent periods. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonably/ virtually certain (as the case may be) to be realised.

Minimum alternate tax

Minimum alternate tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which MAT credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the Statement of Profit and Loss and shown as MAT credit entitlement. Impact of COVID-19 on our business operations

The current outbreak of COVID-19 pandemic has adversely impacted the global economy. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. Subsequently in view of the second wave of COVID-19, various state governments had imposed a complete lockdown on or about the beginning of May, 2021. However, as we are engaged in import/export and trading of agricultural produce and commodities which are 'essential goods', our operations were not shut down during this pandemic. However, due to limited availability of labour, logistics and supply chain constraints, our business were impacted during the initial period of the lockdown. We continued our operations and business activities after making arrangements to meet the government's requirements on sanitization, people movement and social distancing. Major impact was for the months of April, May and June of year 2020. Due to increase in cases in rural areas of Kolhapur and Belgavi district, many villages were not allowing residents to go for work in factories. This severely impacted availability of labour and hence operations.

Since, the relaxation of the aforementioned restrictions, our procurement, day to day operations and logistics have become more regular. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in "**Risk Factors –Risk Factors No. 1** - The Coronavirus disease (COVID-19) pandemic has substantially affected and may continue to affect our business, results of operations, financial condition and cash flows in the future on page 19 of this Draft Prospectus. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

MATERIAL DEVELOPMENTS AFTER OCTOBER 31, 2021

1. Our Company had availed a business loan from our Directors Nana Prakash Mhaske and Anant Pandurang Kulkarni amounting to ₹5 lakhs and ₹11 lakhs which was repaid by our Company on January 14, 2022.
2. Pursuant to resolution of Board of directors dated January 08, 2022, our Company has acquired 99.94% of equity share capital of Siddhivinayak Cashew Industries Private Limited on January 08, 2022.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss related to adverse changes in market prices, including interest rates and foreign exchange rates. In the normal course of business, we are exposed to certain market risks including foreign exchange rate risk and interest risk.

Interest rate risk

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates as well as fixed rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Liquidity risk

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. We have availed working capital limits for our business operations such as maintaining and operating facility, marketing and sales and enhance existing products and the failure to obtain such capital may adversely affect our growth prospects and future profitability.

Credit Risk

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables. Our customer base majorly has creditworthy counterparties which limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.

General

Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits and vice versa. This assumption depends on the yields on the corporate/government bonds and hence the evaluation of liability is exposed to fluctuations in the yields as at the valuation date.

An analysis of reasons for the changes in significant items of income and expenditure is given hereunder:

Unusual or infrequent events or transactions

As on date, there have been no unusual or infrequent events or transactions including unusual trends on account of business activity, unusual items of income, change of accounting policies and discretionary reduction of expenses.

Significant economic changes that materially affected or are likely to affect income from continuing operations.

Apart from the risks as disclosed under Section “*Risk Factors*” beginning on page 19, there are no significant economic changes that may materially affect or likely to affect income from continuing operations.

Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations.

Apart from the risks as disclosed under Section “*Risk Factors*” beginning on page 19, in our opinion there are no other known trends or uncertainties that have had or are expected to have a material adverse impact on revenue or income from continuing operations.

Future changes in relationship between costs and revenues

Our Company’s future costs and revenues will be determined by demand/supply situation, both of the end products as well as the government policies and budget constraints of our customer(s).

Increases in net sales or revenue and Introduction of new products or services or increased sales prices

Increases in revenues are by and large linked to increases in volume of business and also dependent on the price realisation on our products.

Status of any publicly announced New Products or Business Segment

Except as disclosed elsewhere in the Draft Prospectus, we have not announced and do not expect to announce in the near future any new products or business segments.

Total Turnover of Each Major Industry Segment in Which the Issuer Operates

Our business is limited to a production and marketing of food produce and is a single reportable segment. Details of the industry turnover and other relevant information is disclosed in the section “*Industry Overview*” beginning on page 75 of this Draft Prospectus.

Seasonality of business

We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal. Typically, we see an increase in our business during the festive periods and various seasons across the globe. Therefore, our results of operations and cash flows across quarters in a Fiscal may not be comparable sequentially and any such comparisons may not be meaningful, or may not be indicative of our annual financial results or our results in any future quarters or periods, see the section titled “*Risk Factors*” beginning on page 19.

Any Major Dependence on a single or few suppliers or customers

Our sale is well diversified amongst distributes and its not dependent on any individual distributor. This gives company pricing power and therefore this is company’s strength.

The % of contribution of our Company's customer vis-à-vis the total revenue from operations respectively as on Fiscal 2019, 2020 and 2021 is as follows:

Particulars	Top Customers as a percentage (%) of revenues			
	Seven Months Ended October 31, 2021	Fiscal 2021	Fiscal 2020	Fiscal 2019
Top 5	30.38	27.28	17.84	18.38
Top 10	37.16	36.06	17.83	19.00

Particulars	Top Suppliers as a percentage (%) of purchases			
	Seven Months Ended October 31, 2021	Fiscal 2021	Fiscal 2020	Fiscal 2019
Top 5	41.08	49.05	80.82	56.82
Top 10	82.38	59.70	82.41	59.14

Competitive conditions:

Competitive conditions are as described under the chapters “***Industry Overview***” and “***Our Business***” beginning on pages 75 and 99 respectively.

Significant Developments after October 31, 2021 that may affect our results of operations

There have not arisen, since the date of the last financial statements disclosed in this Draft Prospectus, any circumstances which materially and adversely affect or are likely to affect our profitability taken as a whole or the value of our assets or our ability to pay our liabilities within the next 12 months. For further information, see “***Management's Discussion and Analysis of Financial Condition and Results of Operation***”, “***Our Business***”, “***History and Certain Corporate Matters***” and “***Risk Factors***” on pages 184, 99, 112 and 19 respectively. Estimation of uncertainties relating to the global health pandemic from COVID-19 (COVID-19):

The current outbreak of COVID-19 pandemic has adversely impacted the global economy. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. Subsequently in view of the second wave of COVID-19, various state governments had imposed a complete lockdown on or about the beginning of May, 2021. However, as we are engaged in import/export and trading of agricultural produce and commodities which are ‘essential goods’, our operations were not shut down during this pandemic. However, due to limited availability of labour, logistics and supply chain constraints, our business were impacted during the initial period of the lockdown. We continued our operations and business activities after making arrangements to meet the government's requirements on sanitization, people movement and social distancing.

Since, the relaxation of the aforementioned restrictions, our procurement, day to day operations and logistics have become more regular. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in “***Risk Factors***” on page 19 of this Draft Prospectus. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business. For more details, see “***Management's Discussion and Analysis of Financial Condition and Results of Operations***” on page 184 of this Draft Prospectus.
